## Kind attention for Classes Nursery to XII

NIPS/CIRNO/1/P/July/2019-20

Dear Parent,

As you are aware, the monsoon season brings with it the proliferation of water borne diseases such as Dengue, Malaria and Chikungunya. As per the standard government advisory, I am enclosing this list of guidelines for your perusal and compliance, so that we can prevent our children from being afflicted.

I sincerely hope that with your cooperation, support and prayer our children shall stay protected and safe from any illness or disease.

Do's	Don'ts
Keep all the water containers/overhead tanks etc. properly covered.	Don't let water to collect in and around houses, offices, schools, factories etc.
Dry all the desert coolers and containers in house, offices, factories, schools etc. once a week.	Don't let broken earthenware, bottles, pots, flower vase etc. to collect outside or on roof tops.
Add two table-spoons of Petrol/kerosene oil in desert coolers containers, uncovered / improperly covered tanks etc. if they can't be dried weekly.	Don't leave water in desert cooler when not in use.
Use mosquito repellents on exposed parts during daytime to prevent mosquito bites.	Don't store water uncovered or in not properly covered containers/ tanks.
Wear full sleeved clothes and long dresses/ trousers that cover arms and legs, especially during epidemic season to prevent mosquito bite.	Don't store tyres outside in workshops, god owns etc.
Use mesh doors/windows, mosquito coils, vapour mats etc. to keep mosquito away.	Don't give aspirin/ brufen to patients with dengue fever.
Use bed nets even during day time especially for infants and small children.	
Protect dengue patients from mosquito bites by any of above methods.	
Weekly anti-larval measures in and around construction sites where there are water collections.	
Ensure that there is no water logging on the roof top, in the ground areas around the schools and there is no broken furniture in open space.	

R.Buvana
